# Consignes

- Trier une liste de nombres dans l'ordre croissant.
- Utiliser seulement les mouvements autorisés.
- 2 listes sont à notre disposition pour faciliter les manipulations.
- Afficher les mouvements à faire pour trier la liste.

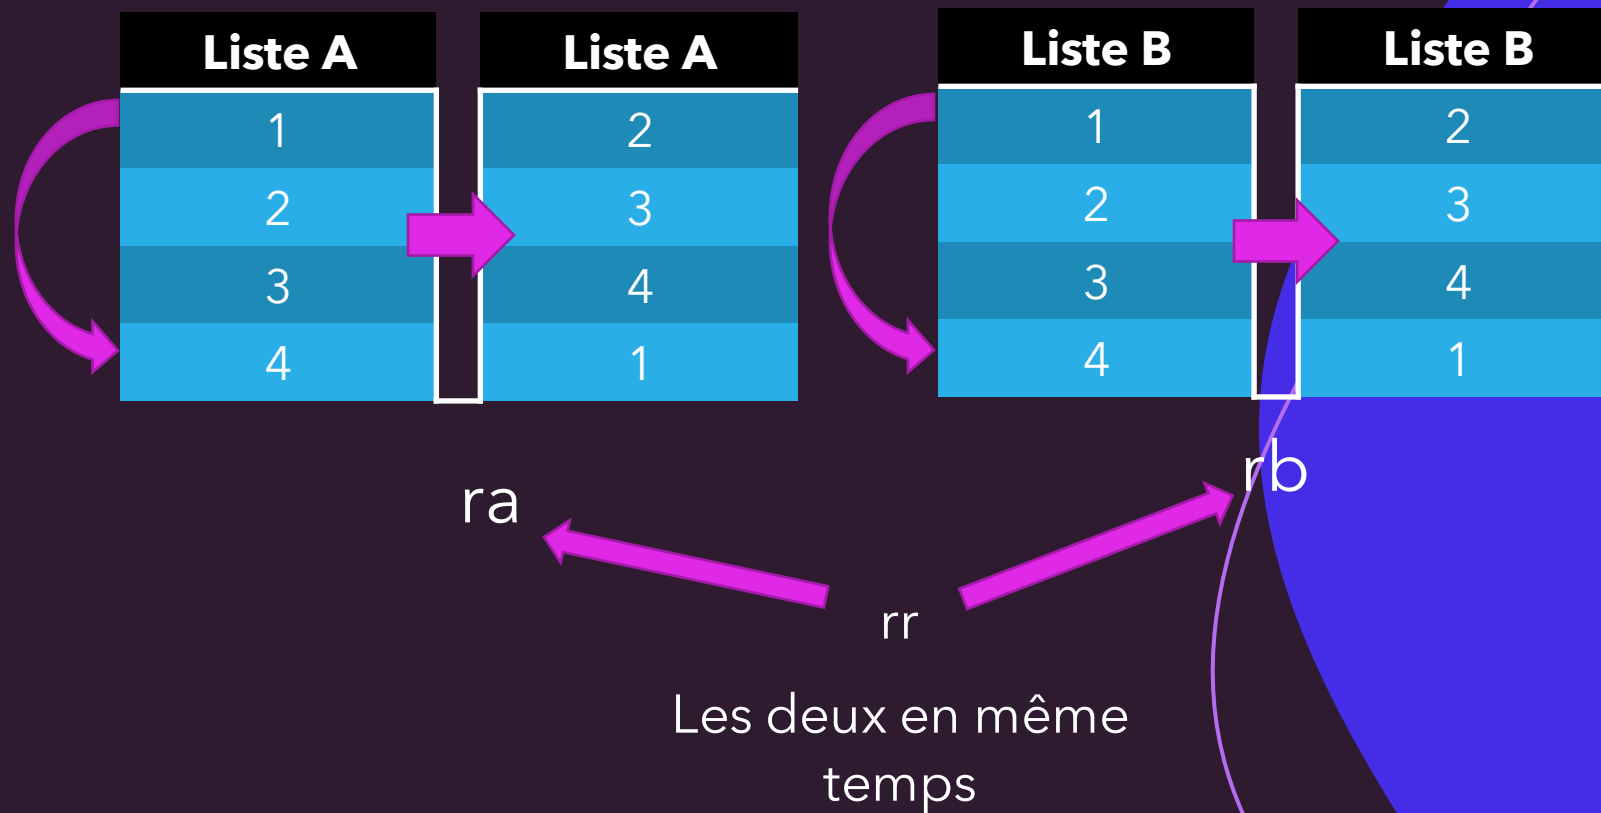

- `./pushswap 4 10 3 7`

# But du projet

Manipulation des listes  
chainées

Recherche d'un  
algorithme de tri le plus  
efficace possible

The background is a solid dark purple. On the left side, there is a large, teal-colored shape that resembles a stylized drop or a thick, curved line. A thin, light purple line starts from the top left, curves downwards and to the right, and then curves back towards the bottom left, passing behind the teal shape.

Basé sur un tri par sélection

Utilise les mouvements 'ra',  
'rra', 'pb' et 'pa'

Assez rapide (mais pas  
assez pour les tests les plus  
poussés)
